

LOKESH VISHWAKARMA

Student

PROFILE

Information Technology student with hands-on experience in the MERN stack for developing responsive web applications. Skilled in both frontend and backend development, with additional experience in IoT projects. Passionate about learning new technologies and sharing knowledge through teaching.

WORK EXPERIENCE

Dec 2024 – Mar 2025

[Adeeva](#), Indore

Digital Marketing Intern

- Designed **5 to 10 website pages** using **Figma** in this internship period.
- Assisted in content creation and digital marketing strategies, contributing to a **20% growth in online reach**.

Jun 2023 – Nov 2024

Byte Buster Institute, Indore

Chief Financial Officer (CFO)

- Worked as a teaching faculty, instructing students in C, C++, and MERN Stack web development. During my working period, I have successfully taught over 10 to 15 students in both online and offline modes.
 - Managed **financial records** for **100+ students**, ensuring 100% accuracy in account sheets.
 - Conducted a **C and C++ workshop** for **50+ students**, enhancing their programming skills.
-

PROJECTS

TITLE: [Karori Academic Advisor](#)

Description: Developed a responsive academic advisory website using **React**, **Tailwind CSS**, and **Framer Motion**. Implemented modular components, animated sections, and optimized performance for scalability. Integrated clean UI design practices with reusable code for maintainability.

TITLE: [Personal Portfolio](#)

Description: Developed a fully responsive personal portfolio using **React.js**, showcasing my projects, skills, and blogs. Integrated dynamic project cards, contact form with **EmailJS**, and smooth routing using React Router. Designed with a modern UI/UX approach using **Tailwind CSS** and **deployed on Vercel**.

TITLE: B&D Creations

Description: Built a MERN stack e-commerce platform for a client with product listings, cart, checkout, user authentication, and admin dashboard. Designed a responsive UI with **React.js & Tailwind CSS** and implemented secure backend APIs with **Node.js**, **Express**, and **MongoDB**.

TITLE: Mini Ecommerce Website.

Description: A simple Mini E-Commerce Web App built with the MERN stack. Includes an **admin panel** for product management and a customer panel with cart and checkout features. Supports local image uploads, cart persistence, and a clean, responsive UI.

TITLE: Biometric Electronic Voting Machine

Description: We developed a **biometric EVM** with **fingerprint authentication** to enhance election security. Using a time module, the system **automatically ends voting** at a set time, with a **token-based system** allowing extensions for voters still in line. Built with **Arduino and biometric sensors**, it ensures fairness, security, and reliability through thorough testing.

CERTIFICATIONS

- MERN Stack Internship: Innovatory Business LLP
 - Full Stack Java: Udemy Certified
 - IoT Internship: Innovatory Business LLP
 - AWS Cloud Architect Associate Level: AWS Academy Graduate
-
